

IT Photography

Students must provide a 35mm SLR camera.

The study of 35mm print photography focusing on darkroom development will be introduced. Advanced studies of digital photography using cameras, scanners, and photo editing software will be explored. Through the camera lens, students will examine how the elements of art and principles of design contribute to effective compositions that communicate a clear message. Students will compare/contrast the history of photography and digital photography. Ethical issues concerning photographic imagery will be explored. Students will produce a portfolio containing both 35mm and digital photographs to be used in multimedia classes. This course is designed for interactive media students seeking an Advanced IT certificate.
